About me

Full-Stack developer with over 4 years of experience in startups in Peru and Chile, building web and mobile applications from architecture definition to cloud deployment. I enjoy collaborating in cross-functional teams, contributing ideas, and solving problems creatively, focused on delivering solid, scalable, and user-oriented products.

Experience

Gux Technologies

Fullstack Developer

Remote - Chile
April 2025 - Present

- Development of digital projects for clients or internal use.
- Collaboration in defining the application architecture.
- Analyzed requirements and delivered end-to-end features, from frontend to database.
- Implementation of unit and integration tests.
- Development of custom websites with WordPress.
- Deployment and maintenance of applications on AWS, using EC2 for servers, S3 for asset storage, RDS/DynamoDB for databases, and Lambda for serverless functions.

Vortrius Game Network

Fullstack Developer

Remote - Chile
February 2023 - May 2025

- Used NextJS for Frontend development, implementing attractive and responsive user interfaces.
- Developed scalable REST APIs with NestJS, optimized to handle high request volumes and maintain optimal performance.
- Worked closely with designers to accurately implement the proposed designs.
- Implemented unit testing using Jest to ensure functionality and stability of the code.
- Worked collaboratively with other developers to launch a mini-app, reaching a peak of 120,000 users and 40,000 concurrent users on Telegram Web Apps.

Curador IA

Frontend Developer

Remote - Peru
June 2022 - March 2024

- Development and maintenance of web applications using React.js and other related technologies.
- Collaborated with cross-functional teams including designers, product managers, and other developers to create high-quality products.
- Implemented responsive design to ensure cross-browser compatibility.
- Developed and maintained reusable components to improve maintainability and product consistency.
